Schedule confirmed on inquiry

6 modules

A practical curriculum covering investment basics, asset classes, fundamental analysis, valuation, portfolio management, and investor discipline.

Published price information

Pricing confirmed on inquiry

The supplied pricing brief does not assign a confirmed standalone fee to this course.

Who this is for

For learners who want a structured path from investment fundamentals to portfolio construction and long-term risk management.

Before you begin: Any prerequisites and recommended prior knowledge will be confirmed before enrollment

Main areas of study

01. Investment fundamentals: investing versus trading, risk, return, compounding, time horizons, and goals
02. Asset classes: equity, debt, mutual funds, ETFs, gold, and other investment assets
03. Fundamental analysis: businesses, revenue, profit, balance sheets, cash flow, quality, and competitive advantage
04. Valuation basics: market capitalization, P/E, P/B, earnings growth, valuation, and margin of safety
05. Portfolio management: construction, diversification, asset allocation, position sizing, risk, and rebalancing
06. Investor psychology and discipline: volatility, emotional decisions, common mistakes, review, and long-term practice

Learning objective

Use a documented framework to evaluate investments, manage portfolio risk, and make more informed long-term decisions.

Format: Format confirmed on inquiry

Before enrollment

Ask for the assigned instructor profile, complete module schedule, assessment details, final fee, and cancellation terms in writing. The next start date is to be confirmed. An inquiry does not reserve a place.
